

Hipercalzado Marketplace to Magento 2 orders synchronization

Purpose and functionality

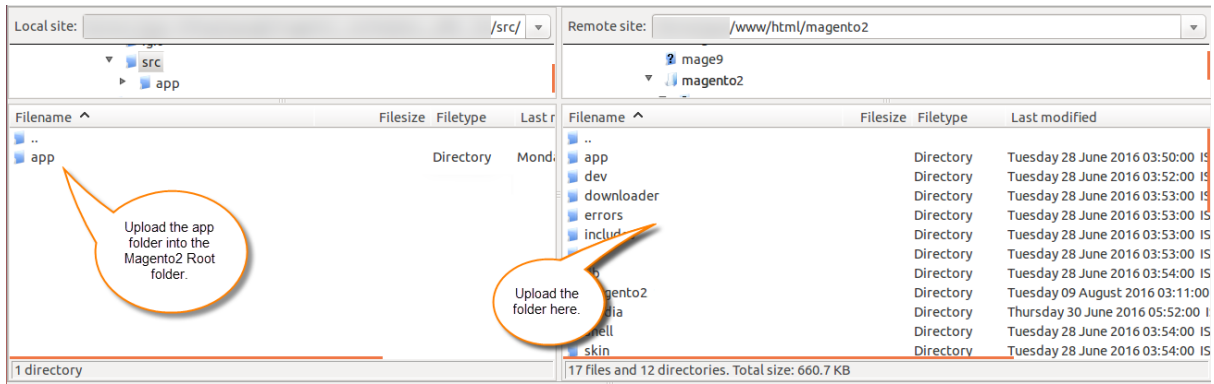

"Hipercalzado" is a module developed with the purpose of allowing you to connect your store with the orders you receive from the Hipercalzado platform.

The main functionalities include the possibility of obtaining Hipercalzado orders and downloading them to your Magento2 store, associating your store's products with orders if they exist, and notifying Hipercalzado of changes in the order status that are made in Magento2.

This connector is developed for Magento 2.4.5 version

Installation

Customers will get a zip folder and they have to extract the contents of this zip folder on their system. The extracted folder has an app folder. You need to transfer this app folder into the Magento2 root directory on the server as shown below.

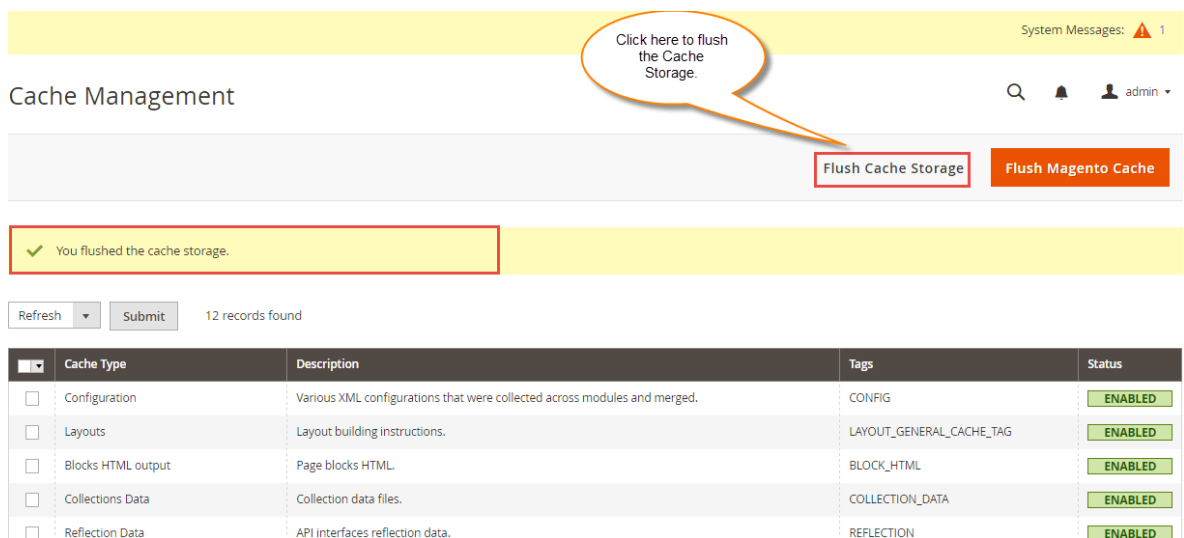

After the successful installation, you have to run these commands in the Magento2 root directory.

First command- `php bin/magento setup:upgrade`

Second Command- `php bin/magento setup:di:compile`

Third Command- `php bin/Magento setup:static-content:deploy`

After running the commands, you have to flush the cache from the Magento admin panel by navigating through->System->Cache management as shown below.

Hipercalzado Connector Configuration

- Go to the admin dashboard and select **STORES >> Configuration >> HIPERCALZADO >> Hipercalzado Connect**

The screenshot shows the Magento 2 admin dashboard configuration page for the Hipercalzado Connector. At the top, a yellow warning banner states: "One or more Indexers are invalid. Make sure your Magento cron job is running." The main heading is "Configuration" with a search icon. Below the heading, the "Scope" is set to "Default Config". The left sidebar contains a navigation menu with icons for Dashboard, Hipercalzado Connector, Sales, Catalog, Customers, Marketing, Content, Reports, Stores (highlighted with a red box), System, and Third Parties & Extensions. The main content area is titled "General Settings" and features a sub-menu on the left with "Hipercalzado" (highlighted with a red box) and "Hipercalzado Connect" (highlighted with a red box). The right side of the page contains several configuration fields:

- User Token** (store view): A text input field containing a series of dots.
- Parent Id** (store view): A dropdown menu with "Product Id" selected.
- State order by default** (store view): A dropdown menu with "Processing" selected.
- Cancel State order** (store view): A dropdown menu with "Canceled" selected.
- State order to notify is sended** (store view): A dropdown menu with "Complete" selected.
- Default carrier for orders** (store view): A dropdown menu with "wk_hipercalzadoconnector_ship" selected.

General settings

General Settings

User Token <small>[store view]</small>	<input type="text" value="....."/>
Parent Id <small>[store view]</small>	<input type="text" value="Product Id"/>
State order by default <small>[store view]</small>	<input type="text" value="Pending"/>
Cancel State order <small>[store view]</small>	<input type="text" value="Canceled"/>
State order to notify is sendes <small>[store view]</small>	<input type="text" value="Complete"/>
Default carrier for orders <small>[store view]</small>	<input type="text" value="wk_hipercalzadconnector_ship"/>

1) User Token

Admin must have entered the user token and to get the token you must be registered as a seller

Then visit the following page:

https://menuweb.es/seller/mis_datos.php

And you can generate your token in the **"Integration"** --> **"API"** tab.

2) Parent Id

Admin can select the **Product Id** or **SKU** for the products that are imported along with orders

3) **State Order by default**

Admin can select the order **Status** here thus the orders imported from the **Hipercalzado Marketplace** will have the order status as selected here

For eg if the admin selects the **State Order by default** as “**Pending**” then the order imported from the marketplace will have the status as “**Pending**”

4) **Cancel State Order**

If **Cancel State Order** is selected as **Canceled** and if admin canceled any order in the Magento platform then the order will also be **Canceled** at the **Hipercalzado Marketplace**

5) **State Order to notify is sended**

To send Shipping details i.e **Tracking Number** from Magento 2 store to Hipercalzado Marketplace

If **State Order to notify is sended** is set as **Complete** then the **Tracking Number** will be updated at the **Hipercalzado Marketplace** order and also **shipping status** will be changed to **Shipped** for the order at **Hipercalzado Marketplace** once the order is completely processed at Magento 2 store along with the tracking number details
